一、首次登录

Two-factor authentication

Authentication code ?

Verify

Open your two-factor authenticator (TOTP) app or browser extension to view your authentication code.

Having problems?

- Use a recovery code or begin 2FA account recovery

点击红框部分。

Two-factor recovery

Recovery code

Verify

If you are unable to access your mobile device, enter one of your recovery codes to verify your identity.

Don't have a recovery code?

- Use your authenticator app
- Where to find recovery codes

Locked out?

Try 2FA account recovery, or unlink your account email address(es)

输入 Recovery Code 即可登录。

Recovery Code 使用情况:

b5f25-c6377

83d09-ecdb2

52c28-4f449

c82da-4a509

a736b-b5091

8a2b8-86c0d

7d37f-76ab5

5ca5d-4407f

a2cd1-a77cd

2dec8-d5270

f047f-36733

0e4b7-f5c7c

1384e-eaa02

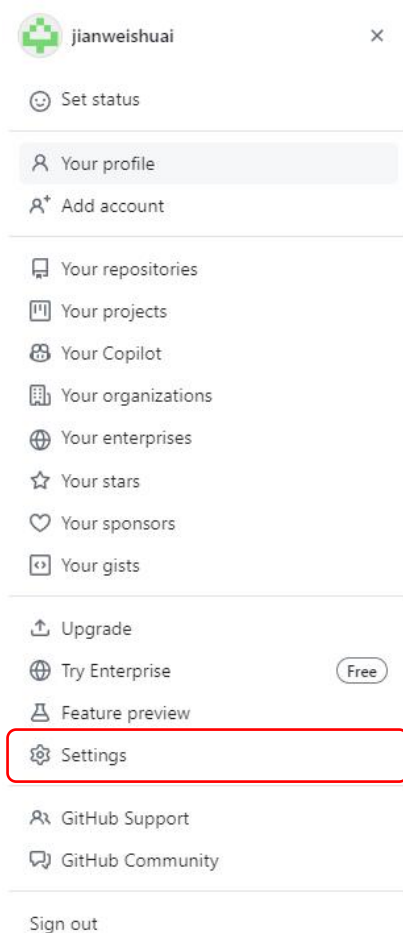

d630f-d5f65

a0f6e-066b0

c8e94-3acec

PS: 已被使用的 Recovery Code 进行标红, 每个 Recovery Code 可登录一台电脑。

二、账号管理者

1、登录 github 后, 打开 **Settings**。

Public profile

Account

Appearance

Accessibility

Notifications

Access

Billing and plans

Emails

Password and authentication

Sessions

SSH and GPG keys

Organizations

Enterprises

Moderation

打开 **Password and authentication**。

Two-factor methods

 **Authenticator app** Configured

Use an authentication app or browser extension to get two-factor authentication codes when prompted.

Edit

找到 **Authenticator app**，点击 Edit。

Two-factor methods

 **Authenticator app** Configured

Edit

Authenticator apps and browser extensions like [1Password](#), [Authy](#), [Microsoft Authenticator](#), etc. generate one-time passwords that are used as a second factor to verify your identity when prompted during sign-in.

Scan the QR code

Use an authenticator app or browser extension to scan. [Learn more about enabling 2FA.](#)

Unable to scan? You can use the [setup key](#) to manually configure your authenticator app.

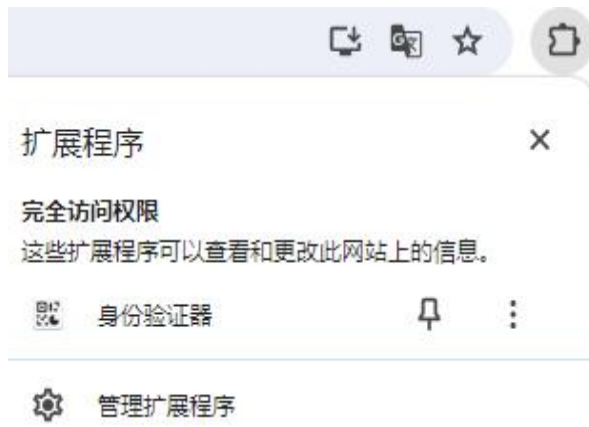

Verify the code from the app

Save

Cancel

得到这个二维码。

2、在 Chrome 商店安装“身份验证器”。

在右上角扩展程序中点开“身份验证器”。

点击右上角红框位置的二维码扫描功能，并扫描 **Authenticator app** 中的二维码。然后你会得到上图中的这一串数字。

The image shows a 'Two-factor authentication' interface. At the top, there's a title 'Two-factor authentication'. Below it is a light gray box containing a smartphone icon, the text 'Authentication code' with a help icon, a text input field with 'XXXXXX', a green 'Verify' button, and instructions: 'Open your two-factor authenticator (TOTP) app or browser extension to view your authentication code.' Below this is another light gray box titled 'Having problems?' with a bullet point: 'Use a recovery code or begin 2FA account recovery'.

之后每次管理者登录时，只需在此页面用“身份验证器”生成的数字登录即可。该数字每隔一段时间都会刷新。

PS：管理者只能存在于一台电脑上。

3、生成 Recovery Code

The image shows a 'Recovery options' interface. It has a title 'Recovery options' at the top. Below it is a section titled 'Recovery codes' with a 'Viewed' status indicator. A 'View' button is on the right. A note states: 'Recovery codes can be used to access your account in the event you lose access to your device and cannot receive two-factor authentication codes.'

当 Recovery Code 用完之后，管理者可以在 **Settings - Password and authentication** 最下面找到 Recovery options。

Recovery codes

Keep your recovery codes as safe as your password. We recommend saving them with a password manager such as [1Password](#), [Authy](#), or [Keeper](#).

 **Keep your recovery codes in a safe spot.** These codes are the last resort for accessing your account in case you lose your password and second factors. If you cannot find these codes, you **will** lose access to your account.

 Download

 Print

 Copy

Generate new recovery codes

When you generate new recovery codes, you must download or print the new codes. Your old codes won't work anymore.

[Generate new recovery codes](#)

进入之后，可以拷贝 Recovery Code，也可以点击红框部分生成新的 Recovery Code。
